

[ACCESS]

[DSL Access]

The Ideal Business Solution

DSL (Asymmetric Digital Subscriber Line) service offers customers high-speed access to connect either single PC's or entire local area networks (LAN's) to the Internet. DSL-enabled service provides fast, reliable, dedicated Internet access digitally over standard copper telephone wires at a lower cost than standard T1 rates. DSL service provides up to 6Mbps downstream (to the customer location) and up to 800K upstream (from the customer location).

DSL is an ideal solution for organizations that require a high bandwidth solution at an affordable price.

What are the benefits?

- Up to 6Mbps throughput: Download speeds 60-100 times faster than a traditional dial-up connection.
- Dedicated Access: DSL is connected to the Internet 24 hours a day, 7 days a week.
- Cost Effective: DSL service provides lower cost than standard T1 rates.
- Consistent Line Speeds: Line speeds do not change as more users added (cable).
- Net Centre Access: ILAP makes it easy as possible to manage your own account. The Net Centre provides clients with easy access to set up new accounts, remove existing accounts, view web based email and view critical account information such as billing statements

DATA CENTRE

ILAP has made substantial investments and will continue to make significant investments in our hardware, software, and people to ensure clients receive a high-quality, reliable Internet experience. Our state-of-the-art data centre is equipped with multi-tiered connections to the Internet, physical and electronic security, uninterrupted power support and a 130KW power generator.

We tightly integrate our solutions with the products and services of leading partners such as Cisco Systems, Sun Microsystems, and Oracle Corporation to ensure peak performance.

Superior Service

“ Ensuring our connections are running 24x7 is critical to Laura Secord. We depend on them to transfer data from our stores across Canada. We are extremely pleased with the speed and reliability of the ILAP connections. I would highly recommend their services to any organization who depends on the Internet for their business.”
